Cleaning Guide; Standard Glass

hglass.au

This comprehensive cleaning guide is designed for use with standard clear and tinted glass products, including float, toughened, laminated, double glazed, translucent, toughened laminate, and soft coat glass. It is important to note that this guide does not apply to painted glass, reflective products, or glass with an exposed Low-E coating. For specific cleaning instructions, please refer to the appropriate guide. The information provided here is intended as general guidance only. It is always advisable to seek specific advice from a professional glazier or window cleaning expert.

General Cleaning

Regular cleaning of glass is crucial to eliminate dust, fingerprints, and other artifacts. The following steps outline a relatively simple cleaning process:

- Apply an adequate amount of cleaning solution to fully cover the glass surface. This can be done using a spray bottle or a saturated cloth.
- Use a clean towel or cloth that is both anti-static and lint-free to scrub the surface after applying the cleaning solution.
- Wipe the glass until the moisture is evenly distributed, allowing the glass to air dry in order to prevent streaking.

Spot Cleaning

For stubborn stains or individual marks, spot cleaning can be employed using the following steps:

- Apply a small amount of methylated spirits to a clean towel or cloth.
- Rub the affected area with the cloth, applying the methylated spirits for cleaning.
- Use a separate clean, dry towel or cloth that is both anti-static and lint-free to dry the area.

Additional Information and Considerations:

- Avoid using metal blades or scrapers, as these can easily scratch the glass surface. Interwest Distributors PTY LTD does not assume responsibility for any damage caused in this manner.
- Refrain from using cleaners containing hydrofluoric or phosphoric acid, as they can corrode the glass.
- Do not clean the glass when it is hot or exposed to direct sunlight.
- Avoid using abrasive cleaners to clean glass or windows, as they can cause damage to the product.

If you are uncertain about how to clean a particular piece of glass, it is recommended to consult a professional glazier or window cleaner for further assistance. Interwest Distributors PTY LTD does not warrant damage caused from improper cleaning techniques.

By following these guidelines, you can ensure the proper maintenance and cleaning of standard glass products.
